

the womb!

Really!

An unborn baby would tell you:

I have a constant supply of nutrients  
delivered as needed

I can think without distractions

the climate and temperature are perfect

Exercising is fun!

I am developing my sense of touch

I look forward to the loving touch  
of my mom and dad

Holding grandma's finger will make her happy

I can't wait to see my mom and dad!

They have been singing  
delightful lullabies to me.

Come!

see me

in the  
womb!

week 1

I attach myself to the wall of my mother's womb; the rich nutrient lining welcomes me. I begin to grow very fast

week 3-4

My heart is beating strongly and steadily, never to stop for the rest of my life

week 6

My brain starts working

week 8

I can swallow and hiccup

week 10

I have eyelids, toenails, fingernails + fingerprints

week 11

I can grasp an object placed in my hand

week 12

I am moving all the time, rarely pausing for more than 5 minutes

week 13

Looking at me, you can tell what family member I resemble

week 16

I can wiggle my toes and make a fist

week 20

I hear my mother's voice and music, too

week 23

I have the ability to survive outside the womb; I will stay in the womb, increasing in weight and nearly doubling in height

week 40

I am born! I see everybody for the first time—but I've been thinking, learning, listening and remembering for the last 3 months!

Where is the most perfect place for a human being? →
